Results shown represent all samples collected through this and last week respectively.

Legend: Protein = 12% Moisture Basis; TKW = 1000 Kernel Weight; FN = Falling Number; FM = Foreign Material; S&B = Shrunken and Broken; n/a = not available.

Soft Red Winter

The 2017 SRW wheat crop plantings are down approximately 6% from last year to 5.68 million acres per USDA. Of the states included in this Survey, North Carolina and Maryland increased plantings slightly, but Ohio is included in the states with a record low of acres seeded.

Weather conditions have been challenging, with a mild winter in the Midwest allowing for the crop to develop ahead of the five year average, but the past week has seen a significant amount of rainfall to the region. North Carolina received up to 4" (10.16 cm) of rain last week while Missouri, Arkansas, Illinois, Indiana and Kentucky all suffered from flooding in areas of each state and standing water in many fields. High winds caused damage in Kentucky and Alabama while the crop in Tennessee and Arkansas has started to color this past week. The crop was last rated between 52 and 80 percent good to excellent in the latest USDA report with the high in Ohio and the low in Kentucky.
