A new study shows USDA market development programs significantly increase export revenue, farm profits and job growth.

Not for profit producer organizations contribute $468.7 million to these programs.

That's more than 70% of annual budgets provide only $28 returned in export revenue for every $1 invested.

The 2016 study confirms a 15% high rate of return that means MAP & FMD contributed more than $309 billion for a grand total of $309 billion of all export revenue!

That means significant positive effects for every farmer & rancher.

Annual export value increased by $8.2 billion of all export revenue.

And an additional 93,000 jobs in farm and food sector.

The 2016 study confirms a very high rate of return. $28 returned in export revenue for every $1 invested.

That's a big boost for the rural economy!

Like increased net farm income by $27.3 billion.

And an additional 93,000 jobs in the farm and food sector.

The study shows MAP & FMD multiply beneficial effects into the whole American economy.

Like increasing economic output by almost $220 billion in overall GDP.

The 2016 study confirms a very high rate of return. $28 returned in export revenue for every $1 invested.

2016 results confirm no matter how you measure the effects, MAP & FMD consistently contribute to economic development across America.

From 2002-2014, MAP & FMD added...

The 2016 study confirms a very high rate of return. $28 returned in export revenue for every $1 invested.

That's more than $16 billion in GDP per year!

240,000 U.S. jobs.

The 2016 study confirms a very high rate of return. $28 returned in export revenue for every $1 invested.

2016 CONCLUSIONS: CONFIRM

No matter how you measure the effect, MAP & FMD consistently contribute to economic development across America.

The 2016 study confirms a very high rate of return. $28 returned in export revenue for every $1 invested.

$16 billion in economic output from 2002-2014.

All farm services, production agriculture and food processing.

The 2016 study confirms a very high rate of return. $28 returned in export revenue for every $1 invested.
