Hard Red Winter

The final 2015 HRW report was issued on September 4. A summary of the milling and baking data will be issued mid-October when all testing has been completed and data evaluated.

Durum

This is the final weekly report for the 2015 durum wheat harvest survey. The average grade is No. 1 HAD, which is up from last year's average of No. 2 AD. Average protein, thousand kernel weight, falling number, test weight and vitreous kernel content (HVAC) have increased from last year. Kernel moisture content, dockage, and total defects are down compared to last year. High values for falling number, test weight, and HVAC reflect the favorable environmental conditions that prevailed throughout harvest.
