Durum: a range of prices are available depending upon various quality attributes and logistics.

+Contact your supplier or local U.S. Wheat office for more information on Gulf HRW 12.5%

† No annual data available

Northern Durum offers from the Great Lakes for April/May 2022 delivery are quoted at \$16.19/bu (\$595.00/MT). For Desert Durum offers, contact your supplier.

Hard White: a range of prices are available depending upon various quality attributes and logistics

*Hard Red Spring: HRS price indications in this report are for a 65% DHV content out of the PNW and a 40% DHV content out of the Gulf; for specific NS/DNS DHV premium spreads, contact your supplier.

Legend: M = Minneapolis Grain Exchange; K = Kansas City Board of Trade; C = Chicago Board of Trade;
 \$ = cash price quote; N/A = quote not available; closed = Great Lakes are closed to vessels for winter; ¢/bu = cents per bushel;
 Futures Contract Month: H = March; K = May; N = July; U = September; Z = December
 NS/DNS=Northern Spring/Dark Northern Spring (subclasses of Hard Red Spring); HRW=Hard Red Winter; SRW=Soft Red Winter; SW=Soft White; WW=Western White (White Club & Soft White)
 F.O.B. = "Free on board" - Seller is responsible for placing grain at the end of the loading spout. Buyer is responsible for providing the ocean vessel and for all other costs after the grain is delivered on board.
 Basis: The difference between the cash price and futures month for specific quality, shipping period and geographical location.

Cash: Durum, SW and WW are quoted in dollars per bushel (\$/bu.) rather than basis for each contract month.

Convert: To compute cash price, add basis level and current futures to get price per bushel. Multiply by 36.743 to get price per metric ton.
 Example: Basis = 70 and Future Price = \$9.00, the price per bushel is \$9.00 + .70 = \$9.70/bu. Price per metric ton is \$9.70 * 36.743 = \$356/MT.

All prices are based upon U.S. number two grade or better as certified by the Federal Grain Inspection Service (FGIS).

The weekly prices as reported by U.S. Wheat Associates are compiled through research from numerous market sources, including U.S. wheat exporters of all classes from various U.S. ports. The prices reported are representative of the value of number two grade and the proteins indicated. **They are not intended to represent offers nor should importers of U.S. wheat rely upon them as such. Additional factors may alter these prices significantly.** These factors may include: (1) payment terms (differing from cash against documents which are the terms used in the U.S. Wheat Associates price report); (2) various quality factors, and method of quality certification; (3) loading terms (USW prices represent Free on Board and do not include loading rate guarantees, stevedoring costs or other elevator tariff charges); (4) different delivery periods than indicated in monthly prices reported by U. S. Wheat Associates. U.S. Wheat Associates recommends regular contact with exporters of U.S. wheat in order to receive offers representative of your requirements. This contact will allow importers to review contract terms and better understand the U.S. grading system, role and function of the Federal Grain Inspection Service (FGIS). Contact: For questions, please contact Michael Anderson at manderson@uswheat.org.

Weekly Price Report May 06, 2022

Wheat futures finished the week up. CBOT soft red winter (SRW) futures were up 54 cents to close at \$10.97/bu. KCBT hard red winter (HRW) futures were up 65 cents to end at \$11.59/bu. MGE hard red spring (HRS) futures were up 43 cents to close at \$12.04/bu. CBOT corn futures were down 26 cents to \$7.92/bu. CBOT soybean futures were down 53 cents at \$16.55/bu.

Basis this week was mixed in the Gulf and down in the Pacific Northwest (PNW). Grain traders are focusing on weather. Some winter wheat areas missed the rain this week, leading to an increase for Gulf HRW basis. SRW basis was flat but for all other wheat classes in the Gulf and PNW, basis was down. Railroad logistics continue to be a factor in U.S. wheat export basis. The Surface Transportation Board (STB) on May 6 announced that it will require U.S. Class I railroads to provide recovery plans and progress reports.

The latest USDA [crop progress](#) report, released May 2, rated 27% of the winter wheat crop as good or excellent, unchanged from the week before. Winter wheat rated as fair dropped 4 points to 30% with 43% rated poor to very poor. Winter wheat headed is 23%, 6 points below the 5-year average of 29%. USDA said spring wheat is 19% planted (with only 5% planted in North Dakota) compared to 46% this same week last year and 9 points below the 5-year average.

Net U.S. wheat commercial sales of 118,800 metric tons (MT) were reported for the week ending on April 28 for delivery in 2021/22, up 268% from last week's 32,300 MT and within trade expectations of 0 MT to 200,000 MT. Year-to-date commercial sales for delivery in 2021/22 total 19.4 million metric tons (MMT), 24% lower than the same time last year. USDA expects 2021/22 U.S. wheat exports will total 21.36 MMT, 21% lower than last year if realized. Net sales for delivery in 2022/23 were 42,449 MT this week.

Much needed rain in the central Plains improved soil moisture. However, southeastern South Dakota, northeastern Nebraska, and central Kansas missed out entirely. Rain also fell on the eastern plains of Montana. In the southern Plains, Texas experienced isolated rainfall in the Panhandle and north-central region, which was enough for minor drought improvement. In the Oklahoma Panhandle small areas of exceptional drought expanded. In the Pacific Northwest, Washington, Oregon and Idaho received light rainfall that was enough to improve conditions.

Crop conditions for French soft wheat deteriorated this week. According to farm agency FranceAgriMer 89% of the soft wheat crop is in good to very good shape, down from 91% last week. However, a lack of rainfall and next week's forecast of warm, dry weather is a concern.

The German Agriculture Minister Cem Oezdemir said this week that Russian attacks on Ukraine's grain infrastructure look like attempts to reduce competition. [CNN](#) and [other media](#) reported that Russia is actively stealing Ukrainian farm equipment and shipping it to Russian farms. It was also reported that Ukrainian grain is being stolen and taken to Crimea, a Russian held province of Ukraine. The Kremlin has denied the accusations.

European Union (EU) wheat exports are down 1.0 MMT compared to last year according to European Commission data. Compared to 2019/2020, wheat exporters are down 27%. The report gave no reason for the slower wheat exports. Earlier this week the commission projected that wheat exports would reach 40.0 MMT in 2022/23, up 25% year-over-year.

Canadian [wheat stocks](#) are 10.1 MMT, down 39% according to Statistics Canada. On farm storage fell 53% while commercial stocks rose 9%. Exports year-over-year are down 44%, falling 7.9 MMT while domestic use increased 15% the report indicated.

The Baltic Dry Index (BDI), an assessment of the average cost to ship raw materials such as grains, coal, and iron ore, increased 13% on the week to end at 2,718.

The U.S. Dollar Index increased from last week's 103.28 to close at 103.45.
