Durum: a range of prices are available depending upon various quality attributes and logistics.

Northern Durum offers from the Great Lakes for December 2022 delivery are quoted at \$11.43/bu (\$420.00/MT). For Desert Durum offers, contact your supplier.

Hard White: a range of prices are available depending upon various quality attributes and logistics

*Hard Red Spring: HRS price indications in this report are for a 65% DHV content out of the PNW and G.L. and a 40% DHV content out of the Gulf; for specific NS/DNS DHV premium spreads, contact your supplier.

Legend: M = Minneapolis Grain Exchange; K = Kansas City Board of Trade; C = Chicago Board of Trade;

\$ = cash price quote; N/A = quote not available; closed = Great Lakes are closed to vessels for winter; ¢/bu = cents per bushel;

Futures Contract Month: H = March; K = May; N = July; U = September; Z = December

NS/DNS-Northern Spring/Dark Northern Spring (subclasses of Hard Red Spring); HRW=Hard Red Winter; SRW=Soft Red Winter; SW=Soft White; WW=Western White (White Club & Soft White)

F.O.B. = "Free on board" - Seller is responsible for placing grain at the end of the loading spout. Buyer is responsible for providing the ocean vessel and for all other costs after the grain is delivered on board.

Basis: The difference between the cash price and futures month for specific quality, shipping period and geographical location.

Cash: Durum, SW and WW are quoted in dollars per bushel (\$/bu.) rather than basis for each contract month.

Convert: To compute cash price, add basis level and current futures to get price per bushel. Multiply by 36.743 to get price per metric ton.

Example: Basis = 70 and Future Price = \$9.00, the price per bushel is \$9.00 + .70 = \$9.70/bu. Price per metric ton is \$9.70 * 36.743 = \$356/MT.

All prices are based upon U.S. number two grade or better as certified by the Federal Grain Inspection Service (FGIS).

The weekly prices as reported by U.S. Wheat Associates are compiled through research from numerous market sources, including U.S. wheat exporters of all classes from various U.S. ports. The prices reported are representative of the value of number two grade and the proteins indicated. **They are not intended to represent offers nor should importers of U.S. wheat rely upon them as such. Additional factors may alter these prices significantly.**

These factors may include: (1) payment terms (differing from cash against documents which are the terms used in the U.S. Wheat Associates price report); (2) various quality factors, and method of quality certification; (3) loading terms (USW prices represent Free on Board and do not include loading rate guarantees, stevedoring costs or other elevator tariff charges); (4) different delivery periods than indicated in monthly prices reported by U. S. Wheat Associates.

U.S. Wheat Associates recommends regular contact with exporters of U.S. wheat in order to receive offers representative of your requirements.

This contact will allow importers to review contract terms and better understand the U.S. grading system, role and function of the Federal Grain Inspection Service (FGIS).

Contact: For questions, please contact Michael Anderson at manderson@uswheat.org.

Weekly Price Report November 04, 2022

Daily Futures Settlement Prices

HRS Export Basis for Nearby Delivery

HRW Export Basis for Nearby Delivery

- The wheat market rallied the first part of the week following Russia's sudden announcement to withdraw from the Black Sea grain deal. Russia quickly backtracked on that decision, and wheat futures fell. Still, December wheat futures all ended the week up. CBOT soft red winter (SRW) futures were up 18 cents, to close at \$8.47/bu. KCBT hard red winter (HRW) futures were up 28 cents from last week, at \$9.53/bu. MGE hard red spring (HRS) futures were up 9 cents to close at \$9.54/bu. CBOT corn futures were up 1 cent, at \$6.81/bu. CBOT soybean futures were up 64 cents, at \$14.51/bu.
- This week, basis was mixed in both the Gulf and Pacific Northwest (PNW). Gulf HRS and HRW basis were down while SRW remained flat. In the PNW HRS basis was flat, while HRW basis and soft white prices were up. Wheat prices remain high, and actions in the Black Sea makes day-to-day pricing challenging to predict. In the Gulf, slow wheat demand has pushed basis down, except for SRW, which remains firm due to the Mississippi River issues. Heavy rain in Australia, which has already led to speculation about milling quality, helped push U.S. soft white prices higher. Steady demand for PNW wheat helped keep basis firm.
- The [USDA reported](#) that, as of October 30, 87% of winter wheat was planted, advancing 8 points from last week and 2 points ahead of the 5-year average. The emergence of newly planted winter wheat is 62%, 3 points behind the 5-year average of 66%. Winter wheat rated good or excellent is 23%, while 37% is rated fair, and 35% is poor or very poor.
- For the week ending October 27, net U.S. wheat commercial sales for delivery in 2022/23 were 348,100 metric tons (MT), within trade expectations of 200,000 MT to 600,000 MT. Year-to-date 2022/23 commercial sales total 12.1 million metric tons (MMT). The USDA expects 2022/23 U.S. wheat exports to total 21.09 MMT.
- North and South Dakota, northern Minnesota, Nebraska, and northern Kansas all recorded above-normal temperatures for the week. Dry weather coupled with windy conditions expanded severe drought conditions in the Dakotas. Dry conditions were widespread in Kansas where the southwest region recorded the driest October on record. In neighboring Colorado, moderate drought continued to expand. Welcome rain fell over north Texas and adjacent southern Oklahoma; some areas recorded 400% of average precipitation for this time of year. Cooler temperatures also helped slow drought development. The Pacific Northwest recorded above-normal temperatures across the region, while northern Oregon saw wetter-than-normal conditions.
- Russia, on October 29, suspended for an "indefinite term" its participation in the United Nations-backed Black Sea Grain Initiative that it signed in July. The deal was set to expire this month, and Russian President Vladimir Putin had previously threatened to withdraw from the multiparty agreement. Chicago Board of Trade (CBOT) wheat futures were up 6% Monday following the news. On Wednesday, Russia reversed course and said it would rejoin the agreement while leaving open the opportunity to withdraw "if provoked."
- Lloyd's of London is again [underwriting insurance](#) for the cargo vessels included in the Black Sea grain corridor following Russia's rejoining the grain deal. The insurer had announced Monday that it was suspending coverage in the area, effectively cutting off trade from the Black Sea.
- Following Russia's decision to rejoin the Black Sea grain deal on Wednesday, European Wheat futures fell 5.1%, nearly to their position before Monday's market reaction. Observers noted that the market retreat was more a correction to the initial reaction and underlined the uncertainty throughout the week. In Germany, tight port capacity carried an 11 euro premium over the Euronext December contract.
- Heavy rain and flooding in [Australia's](#) wheat-growing areas is threatening wheat milling quality just before harvest. Despite a third consecutive year of impressive wheat production, heavy rain may affect as much as half the crop in the eastern grain belt, reported [Reuters](#). The rain will lead to quality issues and likely decrease the amount of quality milling wheat while increasing the amount destined as animal feed.
- Brazil's Paranaguá Port was re-opened after protesters blocked access following President Bolsonaro's loss to rival Luiz Ignacio Lula da Silva. The protests [cut port activity](#) to a fraction of its daily activity. Roads across the country were blocked in protest of da Silva's narrow defeat of Bolsonaro.
- The Baltic Dry Index (BDI), an assessment of the average cost to ship raw materials such as grains, coal, and iron ore, decreased 14% this week to 1,323.
- The U.S. Dollar Index decreased this week. The index was 111.2, lower than last week's close of 113.2.
