Legend: M = Minneapolis Grain Exchange; K = Kansas City Board of Trade; C = Chicago Board of Trade;
\$ = cash price quote; N/A = quote not available; closed = Great Lakes are closed to vessels for winter; ¢/bu = cents per bushel;
Futures Contract Month: H = March; K = May; N = July; U = September; Z = December

NS/DNS=Northern Spring/Dark Northern Spring (subclasses of Hard Red Spring); HRW=Hard Red Winter; SRW=Soft Red Winter; SW=Soft White; WW=Western White (White Club & Soft White)

F.O.B.= "Free on board" - Seller is responsible for placing grain at the end of the loading spout. Buyer is responsible for providing the ocean vessel and for all other costs after the grain is delivered on board.

Basis: The difference between the cash price and futures month for specific quality, shipping period and geographical location.

Cash: Durum, SW and WW are quoted in dollars per bushel (\$/bu.) rather than basis for each contract month.

Convert: To compute cash price, add basis level and current futures to get price per bushel. Multiply by 36.743 to get price per metric ton.

Example: Basis = 70 and Future Price = \$9.00, the price per bushel is \$9.00 + .70 = \$9.70/bu. Price per metric ton is \$9.70 * 36.743 = \$356/MT.

All prices are based upon U.S. number two grade or better as certified by the Federal Grain Inspection Service (FGIS).

The weekly prices as reported by U.S. Wheat Associates are compiled through research from numerous market sources, including U.S. wheat exporters of all classes from various U.S. ports. The prices reported are representative of the value of number two grade and the proteins indicated. They are not intended to represent offers nor should importers of U.S. wheat rely upon them as such. Additional factors may alter these prices significantly. These factors may include:

(1) payment terms (differing from cash against documents which are the terms used in the U.S. Wheat Associates price report); (2) various quality factors, and method of quality certification; (3) loading terms (USW prices represent Free on Board and do not include loading rate guarantees, stevedoring costs or other elevator tariff charges); (4) different delivery periods than indicated in monthly prices reported by U. S. Wheat Associates.

U.S. Wheat Associates recommends regular contact with exporters of U.S. wheat in order to receive offers representative of your requirements. These contracts would allow importers to review contract terms and better understand the U.S. grading system, role and function of the Federal Grain Inspection Service (FGIS).

Contact: For questions, please contact Casey Chumrau at (703) 650-0241 or cchumrau@uswheat.org.

U.S. Wheat Associates

Weekly Price Report

March 21, 2014

Highlights:

- * U.S. wheat futures closed higher this week on concerns about deteriorating crop conditions in the southern U.S. Plains. Strong export demand supported markets, including a SRW cargo purchase by Egypt. Worries about how political tensions in the Black Sea region might disrupt grain shipments helped push futures higher. All three nearby futures contracts closed at a 10 month high on Wednesday. A stronger U.S. dollar limited gains late in the week. KCBT May wheat gained 20 cents on the week to close at \$7.71/bu. MGEX added 9 cents to \$7.43/bu and CBOT increased 6 cents to \$6.93/bu. CBOT May corn fell 7 cents to \$4.79/bu and CBOT May soybeans added 20 cents to \$14.08/bu.
- * USDA's weekly state crop reports indicated declining wheat conditions in Kansas, Oklahoma and Texas – three major HRW producing states. Reports also indicated potential winterkill issues in parts of Kansas.
- * The ten-day weather forecast shows very little potential for precipitation in the U.S. Plains region. Dry conditions persist as winter wheat emerges from dormancy.
- * In its weekly report, USDA reported export sales of 401,800 MT for delivery during the 2013/2014 marketing year, down 16 percent from the previous week and 12 percent from the prior 4-week average and within trade expectations of 250,000 to 500,000 MT. Total known outstanding sales and accumulated exports, through March 13, 2014 were 29.5 million metric tons (MMT), 19 percent greater than last year's year-to-date total of 24.7 MMT. USDA forecasts 2013/14 U.S. wheat exports (including donations) to reach 32.0 MMT.
- * The Baltic Panamax Index remained mostly unchanged from 1,113 last week to 1,112.
- * The US Dollar Index decreased from 79.44 last week to 80.26.
