Legend: M = Minneapolis Grain Exchange; K = Kansas City Board of Trade; C = Chicago Board of Trade;
 \$ = cash price quote; N/A = quote not available; closed = Great Lakes are closed to vessels for winter; ¢/bu = cents per bushel;
 Futures Contract Month: H = March; K = May; N = July; U = September; Z = December
 NS/DNS=Northern Spring/Dark Northern Spring (subclasses of Hard Red Spring); HRW=Hard Red Winter; SRW=Soft Red Winter; SW=Soft White; WW=Western White (White Club & Soft White)
 F.O.B.= "Free on board" - Seller is responsible for placing grain at the end of the loading spout. Buyer is responsible for providing the ocean vessel and for all other costs after the grain is delivered on board.
 Basis: The difference between the cash price and futures month for specific quality, shipping period and geographical location.

Cash: Durum, SW and WW are quoted in dollars per bushel (\$/bu.) rather than basis for each contract month.
Convert: To compute cash price, add basis level and current futures to get price per bushel. Multiply by 36.743 to get price per metric ton.
 Example: Basis = 70 and Future Price = \$9.00, the price per bushel is \$9.00 + .70 = \$9.70/bu. Price per metric ton is \$9.70 * 36.743 = \$356/MT.

All prices are based upon U.S. number two grade or better as certified by the Federal Grain Inspection Service (FGIS).

The weekly prices as reported by U.S. Wheat Associates are compiled through research from numerous market sources, including U.S. wheat exporters of all classes from various U.S. ports. The prices reported are representative of the value of number two grade and the proteins indicated. They are not intended to represent offers nor should importers of U.S. wheat rely upon them as such. Additional factors may alter these prices significantly. These factors may include:

(1) payment terms (differing from cash against documents which are the terms used in the U.S. Wheat Associates price report); (2) various quality factors, and method of quality certification; (3) loading terms (USW prices represent Free on Board and do not include loading rate guarantees, stevedoring costs or other elevator tariff charges); (4) different delivery periods than indicated in monthly prices reported by U. S. Wheat Associates.

U.S. Wheat Associates recommends regular contact with exporters of U.S. wheat in order to receive offers representative of your requirements. These contracts would allow importers to review contract terms and better understand the U.S. grading system, role and function of the Federal Grain Inspection Service (FGIS).

Contact: For questions, please contact Casey Chumrau at (703) 650-0241 or cchumrau@uswheat.org.

U.S. Wheat Associates

Weekly Price Report

April 4, 2014

Highlights:

* Wheat futures closed lower this week due to improved weather forecasts and a bearish USDA stocks report that showed higher U.S. wheat stocks than expected. Spillover weakness in the corn market also added pressure. KCBT May wheat fell 30 cents to \$7.34/bu, CBOT dropped 26 cents to \$6.70/bu and MGEX closed 18 cents lower at \$7.22/bu. CBOT May corn added 10 cents to \$5.02/bu and CBOT May soybeans increased 37 cents to \$14.74/bu.

* In its quarterly stocks report released Monday, USDA estimated U.S. wheat stocks at 28.7 MMT as of March 1, above trade expectations of 28.4. The number prompted speculation that USDA will decrease domestic feed use and increase its U.S. ending stocks projection in the April WASDE.

* USDA released its prospective plantings report on Monday, projecting that 2014 total U.S. wheat acres will fall 1% from 2013 to 55.8 million acres. USDA increased a previous winter wheat acreage estimate to 42.0 million acres, down 3% from last year, which includes 30.2 million acres of HRW. USDA expects a 4% increase in spring wheat area of 12.0 million acres and a 22% increase in durum area of 1.8 million acres.

* Rain showers are expected throughout the weekend in the southern U.S. Plains wheat growing region.

* The Baltic Panamax Index fell from 978 last week to 822.

* The US Dollar Index increased slightly from 80.34 last week to 80.56.
